-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by the admitted prior art of Figs. 1 and 2. The admitted prior art of Figs. 1 and 2 discloses the claimed invention of a suction pipe support comprising a bracket 112 fixed to the compressor body and a strap 118 mounted at both ends to the bracket and having a bending part supporting the pipe 104 and integrally formed at the center portion of the strap.
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art of Figs. 1-2. The admitted prior art of Figs. 1 and 2 discloses the claimed invention except for the plurality of compressors. The number of compressors used in the refrigeration system is considered to be a matter of obvious choice, as plural compressors for a refrigeration system are well known. No criticality or unexpected results are seen or have been disclosed for the use of plural compressors as opposed to a single compressor.

6. Claims 5, 6, 18, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of U.S. Patent No. 4,006,874 to McGee. The admitted prior art of Figs. 1 and 2 discloses the claimed invention except for the vibration ring. McGee teaches a pipe support having a strap 26, 30 and a vibration ring 12, 14 placed between the pipe and the strap. Thus, it would be obvious to provide the admitted prior art of Figs. 1 and 2 with a vibration ring placed between the pipe and the strap 118, in view of McGee, with the predictable result that vibration noises coming from the pipe are not transmitted to the support strap.

7. Claims 7-10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
